Mesopeel

Pure Skin Therapy

Treatment for the acne and oily skin with the combination of chemical peeling and specialized "pure skin action".

Professional cosmetic treatment that improves acne symptoms (comedogenic and inflammatory) and regulates sebum hypersecretion. It has strong antimicrobial and anti-inflammatory action, tightens pores, and accelerates cell renewal, while improving scars and marks that have been created. This treatment is based on the action of special chemical peeling & pure active ingredients. It follows a technique of layering and controlled application sequencing treatments, which also determines the degree of its effectiveness.

Action

Keratolytic, antimicrobial, astringent, sebaceous, comedolytic, anti-inflammatory, antioxidant, cell renewal, regulation of overproduction of melanin.

Indications

Acne, oiliness, dilated pores, superficial acne scars, dull skin, post-inflammatory hyperpigmentation.

Contraindications

Sore skin, sunburn, overly sensitive skin, healing problems, dermatitis, inflammatory rosacea, allergies to any of the ingredients of the products, pregnancy, breastfeeding, herpes, vitiligo, psoriasis, taking isotretinoin in the previous six months, chemotherapy or radiotherapy, history of autoimmune diseases.

Key ingredients

Azelaic Acid, Pyruvic Acid, Salicylic Acid, Succinic Acid, Mandelic Acid, Glycolic Acid

Suggested applications: 8
Session duration: 30 - 45 minutes
Repeatability: 1 or 2 times / month

Step 1: Cleansing

Cleanse the face and neck with Clarifying Cleanser Gel. ***(Duration: 1 minute)***

Step 2: Preparation

Pro-Peel Lotion (2ml)

Soak the cotton pad with Pro-Peel Lotion and apply on the face and neck. Pro-Peel Lotion will lower the pH of the skin and prepare it for the chemical peeling that will follow. Protect the sensitive areas (periocular, perioral, base of nasal wing, moles) by applying an oily cream. Cover the eyes with a cotton swab soaked in water. ***(Duration: 1 minute)***

Step 3: Chemical Peeling

Layering Technique

Apply the products in layers, letting them act according to the maximum recommended time (see table). Check throughout the procedure for erythema before the end of the prescribed time and if observed, neutralize with Post Peel Lotion. The application starts perimetrically of the face and continues towards the center and neck.

Attention:

•The type of chemical peeling, the coexistence of different chemical peeling products, as well as the layering technique applied on the skin are parameters that determine the degree of chemical peeling.

•In case of intolerable irritation, **do not continue to the next session**, but repeat the same, until the skin becomes resistant so as to continue progressively to the next one.

Session guide:

Session	Product	Quantity	Layer (Application / Duration)
1	Azelaic 17% - Mandelic 17%	2ml	① Face & neck up to 6′
	Pure Skin	2ml	② Face & neck up to 3′
2	Azelaic 17% - Mandelic 17%	2ml	① Face & neck up to 6′
	Pure Skin	2ml	② Face & neck up to 5′
3	Glycolic Acid 50%	2ml	① Face & neck up to 2′
	Azelaic 17% - Mandelic 17%	2ml	② Face & neck up to 5′
	Pure Skin	2ml	③ Face & neck up to 5′
4,5	Glycolic Acid 50%	2ml	① Face & neck up to 3′
	Azelaic 17% - Mandelic 17%	2ml	② Face & neck up to 5′
	Pure Skin	2ml	③ Face & neck up to 8′
6	Glycolic Acid 70%	2ml	① Face & neck up to 1′
7,8	Glycolic Acid 70%	2ml	① Face & neck up to 1′
	Azelaic 17% - Mandelic 17%	2ml	② Face & neck up to 1′
	Pure Skin	2ml	③ Face & neck up to 1′

Step 4: Neutralization

Post-Peel Lotion (4ml)
Neutralize by soaking the Post-Peel Lotion in a cotton pad and stamp on the face and neck 2 times until there is no feeling of "burning" / "numbness". In case of severe irritation, apply frozen compresses. ***(Duration: 2 minutes)***

Step 5: Calming / Hydration

5a. Bio-Cellulose Mask (1 item)
Apply the specialized Bio-Cellulose Mask, which offers immediate hydration, cooling sensation and relief of irritated skin and fully adapts to the shape of the face. Its high biocompatibility instantly and evenly reduces the feeling of inflammation and erythema on the skin. First, remove the mask from the sachet and unfold it. Remove the protective film on one side and apply the mask on the face, eyes, and nose according to existing notches. Then, remove the second protective film. Apply the remaining amount of serum from the sachet on the neck and over the mask. Leave it for 15 to 20 minutes and remove. Apply the remaining amount of serum that may have remained on the face with light movements until absorbed.
(Duration: 15-20 minutes)

5b. Calming Bliss (2ml)
Then apply 2ml Calming Bliss for immediate relief and hydration of irritated skin.
(Duration: 1 minute)

(Total Duration: up to 16-21 minutes)

Step 7: Sun protection

Apply Face Mineral Fluid SPF 50 or Face Mineral Fluid Tinted SPF 50 on the face and neck. ***(Duration: 1 minute)***

	Step		Product	Quantity	Duration
