Face

Brightening Therapy

Treatment against dyschromia for restoring the uniformity of color tone with Ameson Mesotech Brightening that contains active and booster peptides to enhance the activity of the key ingredients.

Ameson Mesotech Brightening contains AA2G, a-Arboutin, biomimetic peptides and booster peptides to enhance glowing properties relating to reduction of epidermal melanin biosynthesis by inhibiting enzymatic oxidation of Tyrosine and Dopa.

Action:
Radiance, brightness, uniformity of color tone.

Indications:
Uneven skin color tone, hyper-pigmentation, age spots, photoaging, dull skin.

Contraindications:
Skin with open wounds, moles, keloids, sunburn, overly sensitive skin, healing problems, blood coagulation disorders and problems, dermatitis, in cases of acne and inflammatory rosacea, allergies to any ingredients of the products, pregnancy, lactation, herpes, vitiligo, psoriasis, taking isotretinoin for the last six months, malignancies, chemotherapy or radiotherapy, history of autoimmune diseases, diabetes mellitus and fever.

Key ingredients:
AA2G, a-Arboutin, Oligopeptide-34, Oligopeptide-51, Oligopeptide-58

Recommended applications: At least 5-6, depending on the skin condition.
Duration of session: 45-50 minutes
Repeatability: Every 15 days
Maintenance: Every 45 days

Step 1: Cleansing

Clean the face and neck with Elements Sensitive Cleansing Gel, or the appropriate cleansing product depending on the skin type. ***(Duration: 1 minute)***

Step 2: Chemical Peeling

To increase the final result, Juliette Armand suggests the use of the chemical peeling Bright Skin of the Ameson Mesopeel series.

2a. Pro-Peel Lotion (2ml)

Soak the cotton pad with Pro-Peel Lotion and apply on the face and neck. Pro-Peel Lotion will reduce the pH of the skin and prepare it for the chemical peeling that will follow. Protect sensitive areas (around the eyes, mouth outline, base of nasal wing, moles, etc.) by applying an oily textured cream. Cover the eyes with a cotton pad soaked in water. ***(Duration: 1 minute)***

2b. Bright Skin (2ml)

Apply 2ml of Bright Skin on the face and neck, leaving it to act for up to 7 minutes. Check for erythema throughout the procedure before the end of the recommended time and, if necessary, neutralize with Post-Peel Lotion. Start the application from the outer part of the face and continue towards the center and the neck.
(Duration: up to 7 minutes)

2c. Post-Peel Lotion (4ml)

Neutralize by soaking the Post-Peel Lotion in a cotton pad and applying with the stamping method on face and neck twice until the feeling of "burning" / "numbness" stops. ***(Duration: 2 minutes)***

(Total duration: up to 10 minutes)

Attention: In case of intense irritation, apply cold water compresses and do not proceed to mesotherapy (Step 3) but complete the protocol from Step 4 onwards. If there is a contraindication in using chemical peeling, select the appropriate exfoliating product from the Elements line.

Step 3: Mesotherapy

Brightening (2.5 ml)

Take 2.5ml Ameson Mesotech Brightening from the vial, using a sterile syringe. Sterilize the face and neck with a special skin antiseptic and a sterile gauze. Prepare the Micropen with the appropriate disposable needle tip and adjust the penetration length according to the diagnosis of skin type and area. Divide the face and neck into small areas starting from the forehead. Spread the material on the small area, stretch the skin with the free hand and apply the Micropen vertically and then horizontally with the stamping method, that is, lifting each time and not dragging on the skin. In the same way, continue in the remaining areas, gradually covering the entire face and neck, avoiding the thyroid area. We can repeat the whole procedure one more time, depending on the damage of the skin. Apply topically when there is a single lesion (freckle, age spot, etc.) while on the rest of the face a different Ameson Mesotech treatment can be applied based on the skin needs.

Tip:

Only RNANO needles can be dragged on the skin vertically, horizontally and with the spiral method.

(Total duration: up to 10-20 minutes)

Attention: Sterile gloves and face masks are recommended during the procedure to ensure hygienic conditions.

Step 4: Calming / Hydration

4a. Bio-Cellulose Mask (1 item)

Apply the specialized Bio-Cellulose Mask, which offers immediate hydration, cooling sensation and relief of irritated skin and fully adapts to the shape of the face. Its high biocompatibility instantly and evenly reduces the feeling of inflammation and erythema on the skin. First, remove the mask from the sachet and unfold it. Remove the protective film on one side and apply the mask to the face, eyes, and nose according to existing notches. Then, remove the second protective film. Apply the remaining amount of serum from the sachet on the neck and over the mask. Leave it for 15 to 20 minutes and remove. Apply any remaining amount of serum on the face with light movements until absorbed. ***(Duration: 15-20 minutes)***

4b. Calming Bliss (2ml)

Then, apply 2ml of Calming Bliss, a product for immediate relief and hydration of irritated skin. ***(Duration: 1 minute)***

(Total duration: up to 16-21 minutes)

Step 5: Sun protection

Apply Face Mineral Fluid SPF 50 or Face Mineral Fluid Tinted SPF 50 on the face and neck. ***(Duration: 1 minute)***

	Step	Product	Quantity	Duration
1	**Cleansing System**	Sensitive Cleansing Gel	1ml	1 minute
2	**Chemical Peeling**	Pro-Peel Lotion	2ml	1 minute
		Bright Skin	2ml	up to 7 minutes
		Post-Peel Lotion	4ml	2 minutes
3	**Mesotherapy**	Brightening	2.5ml	up to 10-20 minutes
4	**Calming / Hydration**	Bio-Cellulose Mask	1 item	15-20 minutes
		Calming Bliss	2ml	1 minute
5	**Sun Protection**	Face Mineral Fluid (Tinted) SPF 50	1ml	1 minute

Home Daily Regimen:

Bio-Cellulose Mask
The next day of treatment

Calming Bliss
Morning - Night
(For 3 days)

Face Mineral Fluid SPF 50 or Face Mineral Fluid Tinted SPF 50
Morning (Daily)
